

Flat-trajectory wipers

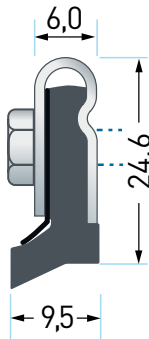

Flat-trajectory wipers

Flange wipers allow for a perfect protection for flanges, slides and tie bars, i.e. for any vulnerable slipways on machine tools. They are able to reliably wipe off dirt, chips, emery, even coolants and lubricants without getting tangled in the wiper itself and causing damage. We produce flange wipers from a special synthetic fine-textured rubber. They are precisely shaped, extremely flexible, but nevertheless resistant to wear and tear. In addition, they are resistant to water, oil, acid and brine.

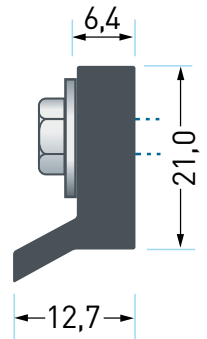

► Type A

- With metal casing and spanner
- Bar length 500 mm

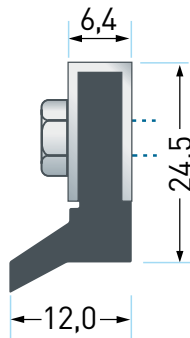

► Type C

- Simple design
- only synthetic rubber
- Bar length 500 mm

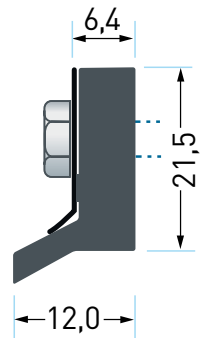

► Type B

- With metal casing
- Bar length 500 mm

► Type D

- Bar length 560 mm
- with spanner

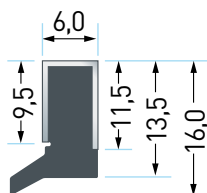

Micro flat-trajectory wipers

Angle and dove-tail wipers with protection coating made of chrome-nickel sheet-steel. Most common prefabricated designs.

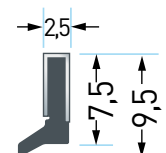

► Type 10

- With metal casing and spanner
- fitting to Types 20-30
- Bar length 500 mm

► Type 31

- For small-sized flat-beds
- with metal casing
- Bar length 500 mm
